Economist

Girl · 12-month exploration plan

A day in the life

9:00 — Analyzing economic data trends and writing insights on a laptop to forecast future market shifts.

11:00 — Collaborating with stakeholders to discuss sustainable economic development proposals.

2:00 — Strategizing policy solutions on a whiteboard to address emerging economic challenges.

4:00 — Presenting innovative economic models and their societal impacts to an expert audience.

Your 12-month plan

01

Track Local Prices

Project details
Choose five everyday items and use price information your family already has to record each item’s price once a week. Add the figures to a notebook or spreadsheet. Draw simple line graphs to show how prices change over the month.

Target skill
Data Analysis

Success criteria
1. A notebook or spreadsheet with weekly price records.
2. At least one clear line graph showing price changes.

Time needed
3–4 hours over the month

02

Interview Family on Spending

Project details
Prepare 5 simple questions about family spending habits. Interview a family member and write down their answers. Summarize the main points and share them with your parent or teacher.

Target skill
Stakeholder Communication

Success criteria
1. A list of 5 questions and recorded answers.
2. A short summary of the interview findings.

Time needed
2–3 hours over the month

Economist · 12-month plan

03

List Community Needs

Project details
Think about your neighborhood and list 5 things that could improve local life (like parks or markets). Write simple ideas on how to address these needs. Discuss your ideas with a family member.

Target skill
Policy Strategy

Success criteria
1. A list of 5 community needs.
2. Simple written ideas for solutions.

Time needed
2–3 hours over the month

04

Explain Economy Basics

Project details
Create a short poster or slide explaining what an economy is and why it matters. Use drawings or simple words. Present it to your family or friends and answer their questions.

Target skill
Presentation Skills

Success criteria
1. A clear poster or slide with basic economy concepts.
2. A short oral presentation to an audience.

Time needed
3–4 hours over the month

05

Collect Price Data Online

Project details
Use free websites to check prices of fruits or vegetables in your city. Record prices for 4 weeks. Compare and note any patterns or changes.

Target skill
Data Analysis

Success criteria
1. A record of weekly online price data.
2. Notes on observed price patterns.

Time needed
3–4 hours over the month

Economist · 12-month plan

06

Survey Friends on Pocket Money

Project details
Make a simple paper survey asking friends about their pocket money and spending. Collect answers from at least 5 friends with help from a parent. Summarize the results in a chart.

Target skill
Stakeholder Communication

Success criteria
1. Completed surveys from 5 friends.
2. A chart summarizing the survey data.

Time needed
3–4 hours over the month

07

Plan a Mini Budget

Project details
Create a simple monthly budget for yourself using pretend income and expenses. Write down how you would save money or spend wisely. Share your plan with a parent for feedback.

Target skill
Policy Strategy

Success criteria
1. A written budget plan with income and expenses.
2. Ideas on saving or spending wisely.

Time needed
3–4 hours over the month

08

Present a Market Story

Project details
Choose a local market or shop and tell a story about how it helps people. Make a short video or talk explaining your story to family or classmates.

Target skill
Presentation Skills

Success criteria
1. A short video or oral story about the market.
2. Audience feedback or questions answered.

Time needed
3–4 hours over the month

Economist · 12-month plan

09

Analyze School Expenses

Project details
List common expenses at your school (books, snacks, transport). Collect approximate costs and analyze which are highest. Draw a pie chart to show expense distribution.

Target skill
Data Analysis

Success criteria
1. A list of school expenses with costs.
2. A pie chart showing expense shares.

Time needed
3–4 hours over the month

10

Discuss Economic Choices

Project details
With family or friends, discuss choices people make when money is limited. Write down different opinions and reasons. Reflect on how these choices affect daily life.

Target skill
Stakeholder Communication

Success criteria
1. Notes on different opinions from discussion.
2. A short reflection on economic choices.

Time needed
3–4 hours over the month

11

Design a Simple Policy

Project details
Think of a small problem in your community (like waste or water). Write a simple policy proposal with steps to fix it. Share your proposal with a teacher or parent for feedback.

Target skill
Policy Strategy

Success criteria
1. A written policy proposal with clear steps.
2. Feedback received from an adult.

Time needed
3–4 hours over the month

Economist · 12-month plan

12

Create an Economy Portfolio

Project details
Gather your past projects and create a portfolio folder or booklet. Add a final presentation explaining what you learned about economics. Present it to family or classmates.

Target skill
Presentation Skills

Success criteria
1. A neat portfolio with past projects.
2. A final presentation summarizing learning.

Time needed
3–4 hours over the month
